Answer Key & Model Answers

| **CH05-SA-001** | Alexander Graham Bell is usually credited with inventing the telephone. He sent the first spoken words by telephone in the year 1876. |

| **CH05-SA-002** | Later in 1876, Bell made the first long-distance call by talking to his assistant, who was located 3.2 kilometres away. |

| **CH05-SA-003** | Bell was awarded the first US patent for inventing a device capable of transmitting human speech electrically over wires. |

| **CH05-SA-004** | By 1915, people could make telephone calls across the United States. In 1927, transatlantic telephone service began across the Atlantic Ocean. |

| **CH05-SA-005** | First cell phones appeared in the late 1970s. Unlike wired home phones, cell phones were wireless, portable, and carried in cars or bags. |

| **CH05-SA-006** | Early phones were bulky and required manual operators at switchboards. Today's smartphones are compact, portable, and operate via touch screens. |

| **CH05-SA-007** | Rotary dial phones featured a circular wheel that users rotated to dial numbers. They became world-famous through classic motion pictures. |

| **CH05-SA-008** | Fax machines were 1970s devices that transmitted written words and printed images electronically using standard telephone wires. |

| **CH05-SA-009** | Early computers connected to the Internet using dial-up modems that transmitted digital data over existing copper telephone lines. |

| **CH05-SA-010** | A "lack of consensus" exists because several researchers (like Elisha Gray) developed speech transmission ideas around the same time, leading to debate over who was first. |

| **CH05-SA-011** | A patent is an official government right granting an inventor exclusive rights to make or sell an invention, protecting it from being copied. |

| **CH05-SA-012** | 'Rotary' means moving in circles. Users dialed numbers by placing a finger in a numbered hole and turning the dial wheel clockwise. |

| **CH05-SA-013** | Smartphones offer high-definition video calling, instant text messaging, internet browsing, email, photography, and GPS navigation. |

| **CH05-SA-014** | Telephones brought the world closer by enabling instant long-distance voice calls, sending faxes, connecting the Internet, and supporting video chats. |

| **CH05-SA-015** | *The first long-distance call was made by Bell in 1876.* |

| **CH05-SA-016** | *Advanced electronics make telephones more useful.* |

| **CH05-SA-017** | **Proper Nouns**: Alexander Graham Bell, Atlantic Ocean.

Common Nouns: invention, telephone. |

| **CH05-SA-018** | Advancements in micro-electronics shrunk bulky mechanical components into microchips, making phones portable, digital, and mobile. |

| **CH05-SA-019** | (a) **Bulky**: Compact / Lightweight

(b) **Consensus**: Disagreement / Dispute |

| **CH05-SA-020** | *In 1927, telephone service began across the Atlantic Ocean.* |

| **CH05-SA-021** | Telephones allow citizens to instantly dial emergency services (police, ambulance, fire department) from anywhere, saving lives in critical situations. |

| **CH05-SA-022** | Operators manually plugged phone cords into physical switchboard jacks to connect caller lines to recipient lines. |

| **CH05-SA-023** | It connected continents across thousands of miles of ocean for the first time, allowing international trade and personal communication. |

| **CH05-SA-024** | **Compound words**: Switchboard, long-distance (or touch-screen). |

| **CH05-SA-025** | The telephone was invented by Alexander Graham Bell in 1876 and evolved from bulky switchboard units into modern touch-screen cell phones. It revolutionized communication by connecting people globally. |

Topic: Grammar - Proper Nouns

Marks: 1

Question: Identify the Proper Nouns in Extract 2.

- (A) United States, Atlantic Ocean
- (B) cell phones, rotary dial
- (C) early versions, motion pictures
- (D) globe, operations

Extract 3

> *"The advancement in electronics made telephones more useful. Fax machines used telephone wires to send words and pictures and became popular in the 1970s. Later, many computers were connected to the Internet through telephone lines. The communication technology further evolved and today we have services like video calling and instant messaging in addition to the voice calling. So we can rightly say that the telephones actually brought the world closer not just in one way but many."*

Answer Key

- | **CH05-EXT-001** | **(B)** | Alexander Graham Bell usually gets the credit. |
- | **CH05-EXT-002** | **(A)** | Sent first spoken words in 1876. |
- | **CH05-EXT-003** | **(B)** | Assistant was 3.2 kilometres away. |
- | **CH05-EXT-004** | **(B)** | Device that could transmit speech electrically. |
- | **CH05-EXT-005** | **(A)** | Consensus = agreement among a group of people. |
- | **CH05-EXT-006** | **(B)** | Cross-US calls by 1915. |
- | **CH05-EXT-007** | **(B)** | Transatlantic service began in 1927. |
- | **CH05-EXT-008** | **(B)** | Bulky and needing manual switchboard operations. |
- | **CH05-EXT-009** | **(B)** | Rotary dial phones immortalized in movies. |
- | **CH05-EXT-010** | **(A)** | United States and Atlantic Ocean are Proper Nouns. |
- | **CH05-EXT-011** | **(B)** | Fax machines used telephone wires. |
- | **CH05-EXT-012** | **(B)** | Computers connected through telephone lines. |
- | **CH05-EXT-013** | **(B)** | Video calling and instant messaging. |
- | **CH05-EXT-014** | **(B)** | Telephones actually brought the world closer in many ways. |
- | **CH05-EXT-015** | **(B)** | Antonym of useful is useless. |

| **CH05-EXT-016** | **Model Answer**: Because multiple researchers around the world were working on transmitting speech electrically at the same time, leading to debates over who created it first. |

| **CH05-EXT-017** | **Model Answer**: Early phones were heavy, bulky, and required manual operators at central switchboards. Modern smartphones are compact, portable, wireless, and feature touch screens. |

| **CH05-EXT-018** | **Model Answer**: Existing copper telephone wires provided an established electrical network that engineers used to transmit printed documents via Fax and digital computer data via modems. |

| **CH05-EXT-019** | **Model Answer**: They allow people in different countries to see each other's faces live and exchange instant text messages, making distance feel non-existent. |

| **CH05-EXT-020** | **Model Answer**: Bell's 1876 call covered 3.2 km locally; by 1915 calls spanned 4,000 km across North America, and by 1927 transatlantic cables connected North America to Europe over 6,000 km. |

| **CH05-EXT-021** | **(B)** | Compact means small, space-saving, and neatly arranged. |

| **CH05-EXT-022** | **(B)** | Late 1970s. |

| **CH05-EXT-023** | **(B)** | Advancements in electronics made telephones more useful. |

| **CH05-EXT-024** | **(B)** | Evolved means developed or progressed. |

| **CH05-EXT-025** | **Model Answer**: The telephone originated in 1876 when Alexander Graham Bell patented speech transmission and made a 3.2 km call. Over the decades, it evolved from bulky switchboards and rotary phones into transatlantic lines, cell phones, and internet connections. Today, touch-screen smartphones offer video calls and instant messaging, uniting the world. |

9. Case & Scenario Based Questions

Scenario 1: The Emergency Call

> Ten-year-old Rohan was home with his grandmother when she suddenly felt dizzy and collapsed. Rohan remembered his parents' instructions to use the family telephone in an emergency.

Question 1

Question ID: CH05-CAS-001

Type: Case Based

Difficulty: Easy

Bloom Level: Apply

Topic: Emergency Telephone Use

Marks: 1

Question: What should Rohan do immediately using the telephone?

- (A) Play a mobile video game.
- (B) Dial the emergency ambulance number (108/112) or call his parents, clearly stating his home address and grandmother's condition.
- (C) Take a photograph of his grandmother.
- (D) Turn off the phone.

Question 2

Question ID: CH05-CAS-002

Type: Case Based

Difficulty: Medium

Bloom Level: Evaluate

Topic: Communication Clarity

Marks: 1

Question: Why is it vital for Rohan to stay calm and speak clearly to the emergency operator?

- (A) So the operator can sing a song.
- (B) So the operator receives exact location details quickly without confusion to dispatch medical help immediately.
- (C) To save battery power.
- (D) To practice public speaking.

Scenario 2: Unknown Caller Safety

> Meera received a phone call on her mother's smartphone from an unknown number. The caller claimed to be a bank official and asked Meera for her mother's bank account number and password.

Question 3

Question ID: CH05-CAS-003

Type: Case Based

Difficulty: Medium

Bloom Level: Apply

Topic: Telephone Safety & Cyber Crime

Marks: 1

Question: What should Meera do in this situation?

- (A) Give the caller all the passwords immediately.
- (B) Refuse to give any personal or bank details, disconnect the call, and inform her parents right away.
- (C) Invite the caller to her home.
- (D) Tell the caller her school timetable.

Question 4

Question ID: CH05-CAS-004

Type: Case Based

Difficulty: Hard

Bloom Level: Evaluate

Topic: Digital Safety Rule

Marks: 1

Question: What golden rule of digital safety does this scenario highlight?

- (A) Never talk to family members.
- (B) Never share confidential passwords, bank details, or personal addresses over the telephone with unknown callers.
- (C) Phones should only be answered at night.
- (D) Passwords should be written on social media.

Scenario 3: Family Connection Across Oceans

> Aarav's aunt lives in London. In the 1920s, calling across the Atlantic Ocean was brand new and very expensive. Today, Aarav's family does a free weekly high-definition video call with her every Sunday.

Question 5

Question ID: CH05-CAS-005

Type: Case Based

Difficulty: Easy

Bloom Level: Understand

Topic: Evolution of Communication

Marks: 1

Question: What technological advancement allowed Aarav's family to switch from costly voice calls to instant video calls?

- (A) Paper letters sent by pigeon
- (B) Advancements in micro-electronics, high-speed Internet, and smartphones
- (C) Manual switchboards
- (D) Telegraph keypads

Scenario 4: Historical Patent Inquiry

> During a science exhibition, two students got into a debate. Student A said Alexander Graham Bell stole the telephone idea, while Student B said Bell earned the official legal credit.

Question 6

Question ID: CH05-CAS-006

Type: Case Based

Difficulty: Medium

Bloom Level: Understand

Topic: Historical Patent Rationale

Marks: 1

Question: How can their science teacher explain the historical facts from Chapter 05?

- (A) Tell them telephones do not exist.
- (B) Explain that while a lack of consensus exists due to simultaneous research, Bell was awarded the first US patent in 1876 for electrical speech transmission.
- (C) Say that Thomas Edison invented everything.
- (D) Say that cell phones were invented in 1800.
